- (5) For all models of the Boeing 727, the flight cycle implementation time is 45.000 flights.
- (6) For all models of the Boeing 737, the flight cycle implementation time is 60.000 flights.
- (7) For all models of the Boeing 747, the flight cycle implementation time is 15.000 flights.
- (8) For all models of the McDonnell Douglas DC-8, the flight cycle implementation time is 30,000 flights.
- (9) For all models of the McDonnell Douglas DC-9/MD-80, the flight cycle implementation time is 60,000 flights.
- (10) For all models of the McDonnell Douglas DC-10, the flight cycle implementation time is 30,000 flights.
- (11) For all models of the Lockheed L-1011, the flight cycle implementation time is 27,000 flights.
- (12) For the Fokker F-28 Mark 1000, 2000, 3000, and 4000, the flight cycle implementation time is 60,000 flights.
 - (b) [Reserved]

No. 29104, 65 FR 24125, Apr. 25, 2000; 65 FR 35703, June 5, 2000; 65 FR 50744, Aug. 21, 2000, as amended by Amdt. 91–266, 66 FR 23130, May 7, 2001; Amdt. 91–277, 67 FR 72834, Dec. 9, 2002; Amdt. 91–283, 69 FR 45941, July 30, 2004. Redesignated and amended by Amdt. 91–297, 72 FR 63410, Nov. 8, 2007]

§91.1507 Fuel tank system inspection program.

- (a) Except as provided in paragraph (g) of this section, this section applies to transport category, turbine-powered airplanes with a type certificate issued after January 1, 1958, that, as a result of original type certification or later increase in capacity, have—
- (1) A maximum type-certificated passenger capacity of 30 or more, or
- (2) A maximum payload capacity of 7,500 pounds or more.
- (b) For each airplane on which an auxiliary fuel tank is installed under a field approval, before June 16, 2008, the operator must submit to the FAA Oversight Office proposed maintenance instructions for the tank that meet the requirements of Special Federal Aviation Regulation No. 88 (SFAR 88) of this chapter.
- (c) After December 16, 2008, no operator may operate an airplane identified in paragraph (a) of this section unless the inspection program for that airplane has been revised to include appli-

cable inspections, procedures, and limitations for fuel tank systems.

- (d) The proposed fuel tank system inspection program revisions specified in paragraph (c) of this section must be based on fuel tank system Instructions for Continued Airworthiness (ICA) that have been developed in accordance with the applicable provisions of SFAR 88 of this chapter or §25.1529 and part 25, Appendix H, of this chapter, in effect on June 6, 2001 (including those developed for auxiliary fuel tanks, if any, installed under supplemental type certificates or other design approval) and that have been approved by the FAA Oversight Office.
- (e) After December 16, 2008, before returning an airplane to service after any alterations for which fuel tank ICA are developed under SFAR 88, or under §25.1529 in effect on June 6, 2001, the operator must include in the inspection program for the airplane inspections and procedures for the fuel tank system based on those ICA.
- (f) The fuel tank system inspection program changes identified in paragraphs (d) and (e) of this section and any later fuel tank system revisions must be submitted to the Flight Standards District Office (FSDO) responsible for review and approval.
- (g) This section does not apply to the following airplane models:
 - (1) Bombardier CL-44
 - (2) Concorde
 - (3) deHavilland D.H. 106 Comet 4C
- (4) VFW-Vereinigte Flugtechnische Werk VFW-614
 - (5) Illyushin Aviation IL 96T
- (6) Bristol Aircraft Britannia 305
- (7) Handley Page Herald Type 300
- (8) Avions Marcel Dassault—Breguet Aviation Mercure 100C
 - (9) Airbus Caravelle
 - (10) Lockheed L-300

Subpart M—Special Federal Aviation Regulations

- § 91.1603 Special Federal Aviation Regulation No. 112—Prohibition Against Certain Flights Within the Tripoli (HLLL) Flight Information Region (FIR).
- (a) *Applicability*. This section applies to the following persons:

§91.1605

- (1) All U.S. air carriers and U.S. commercial operators;
- (2) All persons exercising the privileges of an airman certificate issued by the FAA, except when such persons are operating a U.S.-registered aircraft for a foreign air carrier; and
- (3) All operators of U.S.-registered civil aircraft, except operators of such aircraft that are foreign air carriers.
- (b) Flight prohibition. Except as provided in paragraphs (c) and (d) of this section, no person described in paragraph (a) of this section may conduct flight operations within the Tripoli (HLLL) FIR.
- (c) Permitted operations. This section does not prohibit persons described in paragraph (a) of this section from conducting flight operations within the Tripoli (HLLL) FIR under the following conditions:
- (1) Flight operations are conducted under a contract, grant or cooperative agreement with another department, agency, or instrumentality of the United States Government with the approval of the FAA, or by an exemption issued by the Administrator. The FAA will process requests for approval or exemption in a timely manner, with an order of preference first for those operations in support of U.S. governmentsponsored activities, second for those operations in support of governmentsponsored activities of another State with the support of a U.S. government agency, and third for all other operations.
- (2) Flight operations are coordinated with any mechanism established by paragraph 8 of U.N. Security Council Resolution 1973 (2011).
- (d) Emergency situations. In an emergency that requires immediate decision and action for the safety of the flight, the pilot in command of an aircraft may deviate from this section to the extent required by that emergency. Except for U.S. air carriers and commercial operators that are subject to the requirements of 14 CFR parts 119, 121, 125, or 135, each person who deviates from this section must, within 10 days of the deviation, excluding Saturdays, Sundays, and Federal holidays, submit to the nearest FAA Flight Standards District Office a complete report of the operations of the aircraft involved in

the deviation, including a description of the deviation and the reasons for it.

(e) Expiration. This Special Federal Aviation Regulation will remain in effect for 3 years from the effective date. The FAA may amend, rescind, or extend this Special Federal Aviation Regulation as necessary.

[Doc. No. FAA–2011–0246, 76 FR 16238, Mar. 23, 2011]

§ 91.1605 Special Federal Aviation Regulation No. 77—Prohibition Against Certain Flights Within the Territory and Airspace of Iraq.

- (a) *Applicability*. This rule applies to the following persons:
- (1) All U.S. air carriers or commercial operators;
- (2) All persons exercising the privileges of an airman certificate issued by the FAA except such persons operating U.S.-registered aircraft for a foreign air carrier; or
- (3) All operators of aircraft registered in the United States except where the operator of such aircraft is a foreign air carrier.
- (b) Flight prohibition. No person may conduct flight operations over or within the territory of Iraq, except as provided in paragraphs (c) and (d) of this section or except as follows:
- (1) Overflights of Iraq may be conducted above flight level (FL) 200 subject to the approval of, and in accordance with the conditions established by, the appropriate authorities of Iraq.
- (2) Flights departing from the countries adjacent to Iraq whose climb performance will not permit operations above FL200 prior to entering Iraqi airspace may operate at altitudes below FL200 within Iraq to the extent necessary to permit a climb above FL200, subject to the approval of, and in accordance with the conditions established by, the appropriate authorities of Iraq.
- (3) Flights originating from or destined to areas outside of Iraq may be operated to or from Erbil International Airport (ORER) or Sulaymaniyah International Airport (ORSU) within the territory of Iraq north of 34°30′ North latitude. Such flights may operate below FL200 only when initiating an arrival to or departure from Erbil International Airport (ORER) or
